

GODFRED BIO

Software Engineer | AI/ML Builder | Founder

Cape Coast, Ghana | +233 59 996 6902 | godfredbio2004@gmail.com | github.com/godfredsprim | linkedin.com/in/godfred-bio-0707052bb

PROFILE

Computer Science student, founder, and product-focused software engineer building practical technology for education, healthcare, productivity, commerce, and community organisations in Ghana. Experienced in taking ideas from problem discovery through interface design, backend engineering, AI integration, testing, and cloud deployment. Known for learning quickly, leading student teams, and turning local challenges into usable digital products.

CORE CAPABILITIES

Languages: Python, JavaScript, SQL, Java, C++

Web and Mobile: Flask, FastAPI, Django, React, Next.js, React Native/Expo, Streamlit

AI and Data: Scikit-learn, TensorFlow, OpenCV, Pandas, computer vision, model integration, RAG concepts

Engineering: REST APIs, PostgreSQL, SQLite, Prisma, authentication, Git/GitHub, testing, responsive UI

Deployment: Render, Vercel, Railway, Streamlit Cloud, Replit, Docker fundamentals, cloud storage concepts

EXPERIENCE AND LEADERSHIP

Founder and Technical Lead — SOLVXIT-GH

2026 - Present

- Lead the design and development of digital products for students, schools, small businesses, and community organisations, translating client needs into technical scopes and working software.
- Coordinate product planning, frontend and backend implementation, quality assurance, deployment, and team collaboration across multiple university-led projects.
- Build reusable product concepts in education technology, business operations, food delivery, voting, healthcare support, and service marketplaces.

AI/ML Engineering Intern — Codveda Technologies

2026

- Completed practical machine-learning work covering missing-data treatment, categorical encoding, feature scaling, and reproducible train/test preparation workflows.
- Applied Python, Pandas, and scikit-learn to convert raw datasets into analysis-ready inputs and communicate technical decisions clearly.

Machine/AI Engineer Intern — Thrive Africa

- Contributed to machine-learning workflows including data preprocessing, model experimentation, and evaluation for AI-driven product features.
- Collaborated remotely with a distributed engineering team to build and test AI components, following version control and code-review practices.

IT Support Engineer Intern — SDA Hospital

- Provided first-line IT support for hospital staff, troubleshooting hardware, software, and network issues to minimise downtime in a clinical environment.
- Assisted with maintenance of computers, printers, and networked devices, and supported basic system and user-account administration.

FLAGSHIP PRODUCTS

BroxStudies | Python, Flask, AI, JavaScript, Moolre | broxstudies.com

- Created an AI-powered study platform for Ghanaian SHS and TVET learners facing limited practice material under the new curriculum.
- Designed AI study support, topic-based questions, likely-exam practice, progress tools, library content, peer quiz challenges, subscriptions, and mobile-money payment flows.

BisaRx | Python, Flask, AI, multilingual voice UX | bisarx-8ym0.onrender.com

- Built a multilingual health-support portal for structured symptom intake, body-map reporting, red-flag escalation, pharmacist consultation, and patient profile management.
- Implemented English, Twi, Hausa, and French experiences, voice-to-text intake, Google OAuth, role-based dashboards, case workflows, and medication-order support.

- Defined a modern voting platform supporting free elections and paid-per-vote campaigns, with transparent organiser payouts and platform commissions.
- Designed election creation, voter verification, live results, fraud controls, audit trails, Moolre mobile-money payments, SMS notifications, and administrative reporting.

ADDITIONAL PRODUCT PORTFOLIO

Additional builds: FocusOS/FocusCam (computer-vision productivity tracker); DCLM Church Manager (attendance, finance, and member administration); Job Match Ghana (candidate-role fit scoring); Daakye Student Analytics (school-performance dashboards); SolidHands Engineering (corporate site with vacancy and contractor management); plus concept builds including Science Marketplace, SalonPro, Kooqs, Tasty Chef, Hostellink UCC, SkillChain, AgroSense AI, and NFC-based digital identity.

EDUCATION

Bachelor of Science in Computer Science — University of Cape Coast

Expected 2028

- Academic interests: artificial intelligence, machine learning, software engineering, database systems, algorithms, computer architecture, and data analytics.

COMPETITIONS, COMMUNITY, AND PROFESSIONAL FOCUS

- Builds and presents technology concepts for hackathons and innovation programmes, including AI, ICP/Web3, data science, productivity, and Ghana-focused problem solving.
- Creates beginner-friendly technical learning materials and practical demonstrations in Python, data cleaning, visualisation, and Google Colab.
- Interested in AI/ML engineering, full-stack software engineering, product development, data analytics, technical leadership, and mission-driven startups.

CERTIFICATIONS

Cisco Networking Academy: Python Essentials I, JavaScript Essentials I, Introduction to Cybersecurity, Internet of Things, Introduction to Networking

Sololearn: Vibe Coding

LANGUAGES AND AVAILABILITY

Languages: English (professional), Twi (fluent), Sefwi (conversational)

Available for: internships, graduate-track opportunities, freelance projects, remote collaborations, and hackathon teams
